

# The HIRC Transparency Badge - Provider

A Healthcare Standard for Supply-Chain Transparency

---

## Why It Matters to Providers

More than 40 healthcare systems reference the HIRC Transparency Badge in their RFPs.

The Badge provides structured, enterprise-level supply-chain visibility—without requiring your team to independently collect and reconcile transparency data from each supplier.

---

## What It Provides

The Transparency Badge indicates that a supplier has shared:

- Enterprise-level manufacturing-site geography
- Structured resiliency diagnostics

Information is standardized and securely accessible through the HIRC Vault to providers.

---

## How You Use It — Providers

- Reference the Badge in RFP and RFI transparency expectations
- Review shared manufacturing and risk-context information during evaluation
- Incorporate transparency inputs into sourcing and governance discussions

---

## What Value It Delivers

The Transparency Badge helps you:

- Avoid chasing supplier-by-supplier data requests
- Compare suppliers using consistent inputs
- Identify geographic and operational concentration risks earlier
- Reduce administrative burden across sourcing cycles

**The result:** faster sourcing decisions, clearer visibility, and stronger continuity planning.
