

HIRC Academy

Purpose

HIRC Academy is HIRC's twice-annual forum for advancing resiliency, transparency, and partnership across the healthcare supply chain.

The Academy brings together providers, suppliers, GPOs, and strategic partners to build relationships, advance industry strategy, and accelerate implementation of HIRC standards that strengthen supply assurance and support continuity of patient care.

Build Relationships

Academy brings together healthcare providers, suppliers, GPOs, and strategic partners to strengthen connections, recognize leadership, and foster collaboration across the healthcare ecosystem.

Participants build relationships that support long-term resiliency.

Advance Strategy

The Executive Track is designed for leaders responsible for shaping the future of healthcare supply chain resiliency.

Through panels, roundtable discussions, and collaborative report-outs, participants explore the strategic actions needed to strengthen healthcare supply chain resiliency.

Accelerate Execution

The Execution Track is designed for practitioners responsible for operationalizing resiliency and transparency within their organizations.

Through peer-to-peer learning, lessons learned, and implementation resources, participants gain practical approaches they can apply within their organizations.

What Participants Gain

Participants leave Academy with:

- Stronger industry relationships
- Practical implementation resources
- Peer-tested lessons learned
- Emerging resiliency and transparency priorities
- Clearer pathways for standards adoption

Who Should Attend

HIRC Academy is designed for:

- Healthcare providers and health systems
- Medical suppliers and manufacturers
- Group Purchasing Organizations (GPOs)
- Strategic and technology partners
- Supply chain, operations, and resiliency leaders

Supporting the HIRC Vision

HIRC Academy is a strategic enabler of HIRC's mission and 2031 Vision.

By building relationships, advancing strategy, and accelerating execution, Academy helps organizations transform resiliency, transparency, and partnership from concepts into operational practice.

The result is stronger industry alignment, stronger supply assurance, and stronger continuity of patient care.

Relationships. Strategy. Execution.
